Company Announcement
Regulatory Approval in Malaysia for Bioeffective A

The Directors of Solagran Limited are pleased to announce:

- a/ Regulatory approval for a new Bioeffective A herbal product (Nuvanta Conifer Green Needle Complex Vegicaps) by the Malaysian Drug Control Authority (DCA).
- b/ Appointment of a licensee for Solagran's Bioeffective trademarks and logo in Malaysia.

Solagran's Chairman, Dr Vagif Soultanov has said; "Whilst product registration is always a difficult waiting game for any Biotech organisation, strategically we see this as an important milestone. The Malaysian Drug Control Authority (DCA) is one of the most well respected regulatory authorities in the South East Asian region, known for its strict and in-depth evaluation. As such, Solagran views this approval as further recognition of the therapeutic benefits of Bioeffective A, and a positive step towards achieving distribution of our products globally."

The distributor and product license holder for this new 160mg Bioeffective A capsule will be Nuvanta Sdn Bhd who belong to the Zuellig Group of Companies* and has been in the forefront in the marketing of evidence-based supplements in Malaysia.

Nuvanta has been chosen over previous opportunities that have presented to Solagran, based on its wide market knowledge and experience in the distribution of dietary and herbal supplements. In addition, Nuvanta has successfully developed an extensive support network of independent and retail chain pharmacists, as well as other healthcare professionals throughout the local market.

The approval by the Malaysian Drug Control Authority will see Nuvanta commencing distribution of Bioeffective A to potential consumers throughout Malaysia in the near future. The product will be manufactured in Australia by Catalent Pharma Solutions.

**The Zuellig Group Inc. has built upon its history for a century to become one of the largest privately-owned companies in the world with a turnover of US\$12 billion. Today, The Zuellig Group owns and manages a diversified portfolio of industry-leading businesses in Asia Pacific region. The interests of these businesses span the four sectors of: Healthcare and Pharmaceuticals; Agribusiness Manufacturing and Distribution; Agricultural Equipment Supply and Materials Handling; and Properties.*
